

Grade 1–3 Science

Exploring the World Through Stories, Play, and Curiosity

What is this program about?

This course is designed to spark your child’s natural curiosity and help them make sense of the world—one engaging story at a time. Using beautifully illustrated picture books, interactive games, and hands-on activities, we guide children through exciting topics like how people live in different places, the amazing history of our world, how our brains and emotions work, and why caring for our planet matters.

Our goal is not only to teach facts, but to help your child think, ask questions, and express themselves confidently—skills that will benefit them in every subject as they grow.

What Your Child Will Learn - [StoryBee Foundational Series](#)

Human Geography

Topics: What is Human Geography · Humans and Environment · Maps and Mapmaking · Population and Resources · Migration · Cultural Patterns · Language as a Cultural Connector · Agriculture · Developed vs Developing Countries

Learning Value: Builds awareness of global structures, human–environment relationships, and cultural diversity, fostering early global citizenship.

History

Topics: Europe in the Middle Ages · Golden Ages in China · The Silk Roads · Indian Ocean Trade · The Mongol Empire · The Spice Trade · The Renaissance · The Age of Exploration · The New World · The Scientific Revolution

Learning Value: Cultivates historical awareness, perspective-taking, and an appreciation of cross-cultural connections.

Basic Psychology

Topics: History of Psychology · Feelings and Emotions · Empathy · The Brain · How We Learn · Memory · Motivation · Stress

Learning Value: Develops emotional intelligence, self-awareness, and interpersonal skills critical for healthy social development.

Environmental Science

Topics: Ecosystems · Climate Change · The Atmosphere · The Sun · Weather · Symbiosis · Biodiversity · Adaptations · The Carbon Cycle · The Nitrogen Cycle · Clear-cutting · What is Pollution

Learning Value: Encourages responsible environmental stewardship and builds foundational scientific reasoning skills.

What This Means for Your Child

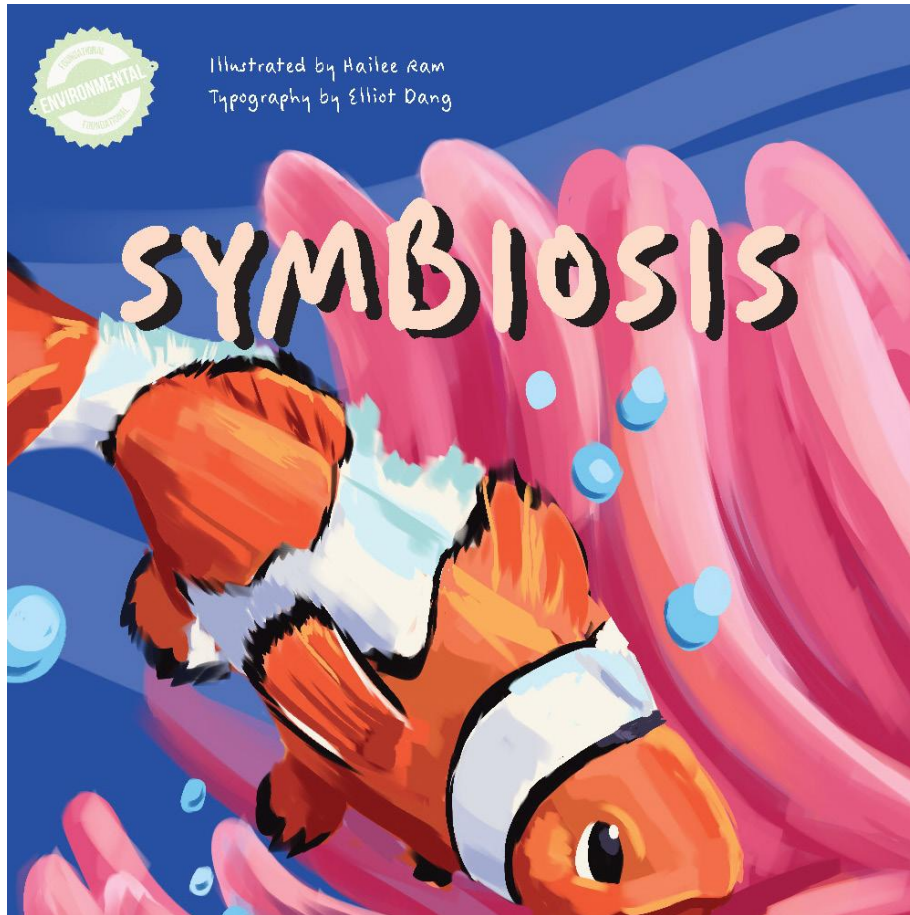

By the end of the program, your child will be able to:

- Explain, in their own words, how people and nature are connected.
- Retell important historical events like a story.
- Understand their own feelings and communicate them clearly.
- Make environmentally friendly choices in everyday life.

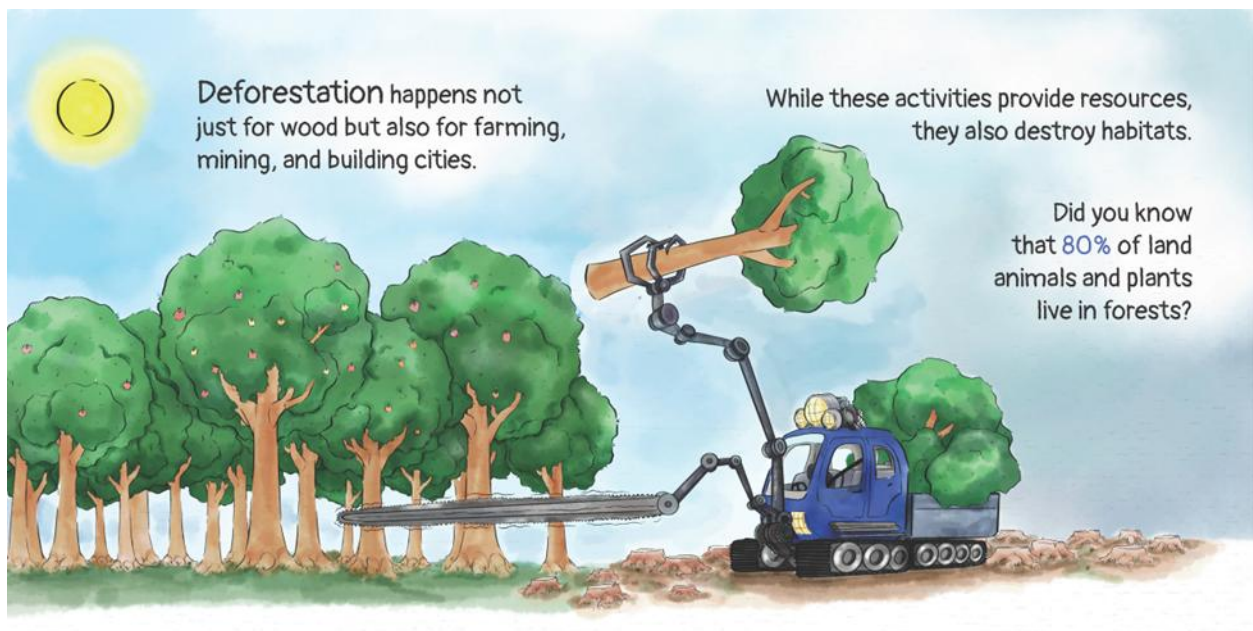

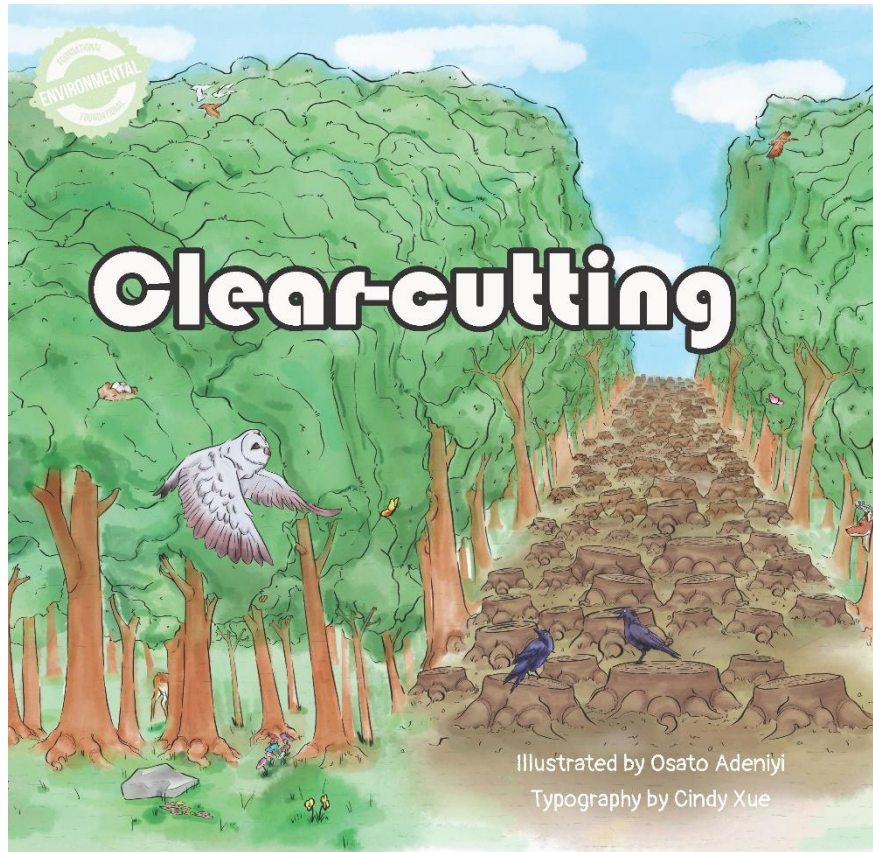

Why Parents Love This Program

- **One Theme, One Story per Class:** Easy for kids to remember and connect ideas.
- **Learning Through Play:** Role-play and games make big ideas simple and fun.
- **Life Skills Included:** Public speaking, teamwork, and problem-solving are woven into every lesson.
- **Confidence Boosting:** Children feel proud to share what they've learned at home.
