

Financial Literacy for Grades 4–6 and Above

Macroeconomics · Microeconomics · Stories of the Nobel Prize in Economics

Course Overview – [The StoryBee Foundational Series](#)

This course is designed for upper elementary and early middle school students, introducing them to world-class economic thinking from a young age. Through engaging stories, interactive activities, and hands-on simulations, we turn complex economic concepts into relatable life lessons. Students explore macroeconomics, microeconomics, and real-world Nobel Prize–winning case studies, building a strong foundation in money management, market understanding, and global awareness.

Core Topics

Macroeconomics

- GDP, inflation, and economic cycles
- International trade, fiscal and monetary policy
- How government spending, taxes, and interest rates shape the economy

Microeconomics

- Supply and demand, pricing, and market structures
- Decision-making, business models, and company operations
- Labor markets, competition, and public goods

Nobel Prize in Economics Stories

- Inspiring real-life award-winning research
- How innovative ideas solve global economic challenges
- Lessons from trade, public resources, markets, and human behavior

Learning Outcomes

By the end of the program, students will:

- 💰 Understand core concepts like income, spending, saving, and investing
- 📊 Explain supply, demand, and price changes using real-life examples
- 🌍 Develop a global perspective on how economies affect societies and everyday life
- 🗣️ Strengthen logical thinking, decision-making, and problem-solving skills

Why It Matters for Your Child

Macroeconomics helps children see the bigger picture—how national and global economies work, and how policies influence daily life—nurturing both big-picture thinking and global awareness.

Microeconomics connects directly to everyday choices, teaching children the logic behind spending, pricing, and business decisions, and building a foundation for future financial and entrepreneurial success.

Nobel Prize Stories inspire curiosity, critical thinking, and creativity by showing how world-changing ideas are born, tested, and applied, empowering children to think beyond the classroom and envision their own contributions to society.

Macroeconomics

- **What is Macroeconomics** – Understand how national economies work and develop a big-picture way of thinking about the economy.
- **What is Money** – Learn the nature and functions of money to build a strong financial foundation.
- **Saving and Investing** – Grasp core principles of personal finance and develop long-term planning skills.
- **What is a Bank** – Discover how banks function and the services they provide, boosting financial literacy.
- **What is Tax** – Understand the role of taxes in society and the economy, fostering civic awareness.
- **The Power of Trade** – International trade matters and gain a global perspective.
- **Gross Domestic Product (GDP)** – How to measure economic performance.
- **Inflation** – Understand why prices change and how inflation impacts daily life.
- **Business Cycles** – Economic ups and downs.
- **Fiscal Policy** – Explore how governments use spending and taxation to manage the economy.
- **Government Deficits and Debt** – Understand the relationship between debt and economic growth.
- **Interest Rates** – Learn how rates influence saving, investing, and spending.
- **Money Creation** – Discover how the banking system creates money.
- **Monetary Policy** – See how central banks steer the economy.
- **Currency Exchange** – Understand exchange rates and their impact on trade.
- **Globalization and Growth** – Learn about the opportunities and challenges of an interconnected global economy.

Learning Value: Studying macroeconomics helps children understand how national and global economies operate. They learn how fiscal, monetary, and trade policies shape everyday life, develop a global mindset, and build analytical skills to interpret social and economic events.

Microeconomics

- **What is Microeconomics** – Learn the basic principles behind how individuals and businesses make economic decisions.
- **Marginal Thinking** – Develop the skill to weigh costs and benefits to make the best choices.
- **What is Demand** – Understand how consumer needs and market prices are connected.
- **What is Supply** – See how producers respond to market prices and demand.
- **The Invisible Hand** – Discover how markets can balance themselves without direct control.
- **Elasticity** – Learn how price changes influence buying and selling decisions.
- **Labor Markets** – Explore how wages, employment, and productivity are linked.
- **Short Run vs Long Run** – Understand how economic behavior changes over time.
- **Understanding Costs** – Learn how businesses analyze and manage their costs.
- **Production Process** – Follow the journey from raw materials to finished products.
- **Monopoly** – See how one seller can control a market and influence prices.
- **Oligopoly Games** – Explore strategies companies use when only a few competitors exist.
- **Monopolistic Competition** – Understand markets where products are similar but differentiated.
- **Perfect Competition** – The ideal market model and its real-world significance.
- **Monopsony** – What happens when there's only one major buyer in a market.
- **Public Goods** – Why some goods, like parks or streetlights, are provided for everyone.
- **Externalities** – How economic actions can impact people who aren't directly involved.
- **Inside a Company** – Understand how different departments work together to keep a business running.

Learning Value: From pocket money to store pricing, microeconomics helps children understand the economic rules behind daily life. It builds decision-making skills, logical thinking, and market awareness—laying a strong foundation for future business and finance learning.

Nobel Prize Stories in Economics

- **Nobel Laureates in Economics** – Learn from real-life examples of groundbreaking economic ideas.
- **The Prize for Economic Sciences** – Understand the purpose and prestige of the world's highest economics award.
- **2008 – Trade and Variety** – See how diverse trade can drive economic growth.
- **2009 – Public Resources** – Understand the challenges and solutions in managing shared resources.
- **2010 – The Picky Companies, the Picky Workers** – Learn about matching jobs with the right people.
- **2011 – A Tangled World** – Discover how economies are connected globally.
- **2012 – The Perfect Match** – Understand how to best allocate resources to meet needs.
- **2013 – The Crazy Stock Market** – Explore stock market ups and downs and investment risks.
- **2014 – The Monopoly Monster** – Learn how large companies impact markets.
- **2015 – Money and Happiness** – Examine the link between wealth and well-being.
- **2016 – Agreements** – See why cooperation and negotiation are vital in economics.
- **2017 – Silly Choices** – Understand why people sometimes make poor economic decisions.
- **2018 – A Better Future** – Learn how economics can improve quality of life.
- **2019 – The Poverty Puzzle** – Explore the causes of poverty and ways to address them.
- **2020 – The Auction** – Understand how auction systems work and affect prices.
- **2021 – The Natural Experiment** – Discover how real-life situations can prove economic theories.
- **2022 – The Bank Run** – See why banks can be vulnerable during financial crises.
- **2023 – The Gender Pay Gap** – Learn about the causes of wage differences and ways to close the gap.

Learning Value: The Nobel Prize in Economics introduces children to world-class economic thinking at an early age. It nurtures critical and creative thinking, connects theory to real life, strengthens problem-solving skills, and broadens their global perspective.

《Understanding Microeconomics》

Microeconomics
is in every choice
you make.

When you only have enough money for one thing, you
have to choose between a new toy or a new book.

If you choose the toy, the book is your
Opportunity Cost.

Microeconomics is the story of
how we choose, what we get,
and what we give up.

《What is Demand》
